ER30001   **"1968 INTERVIEW NUMBER"**

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER31996   "SAMPLING ERROR STRATUM"

Sampling Error Stratum

This is the stratum code required for complex variance estimation that takes the stratified multistage sample design into account through the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable and ER31997 are needed to correctly compute variance estimates for all types of PSID analyses. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

Value/Range	Code Value/Range Text
1 - 32	Core sample stratum code

88 - 94	Immigrant 17/19 sample stratum code

ER31997   "SAMPLING ERROR CLUSTER"

Sampling Error Cluster

This variable defines pairs of units within each stratum (ER31996), and is needed for computing sampling errors using the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable should be used in conjunction with ER31996. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

ER33601   "2001 INTERVIEW NUMBER"

2001 Interview Number (2001 ID Number)

The values for this variable represent the 2001 interview number of the family in which this individual was included in 2001. We interviewed 7,406 families in 2001.

Value/Range	Code Value/Range Text
1 - 7,457	2001 family interview number
0	This individual was main family nonresponse by 2001 or mover-out nonresponse by 1999; from Latino sample (ER30001=7001-9308)

ER33602   "SEQUENCE NUMBER   01"

2001 Sequence Number

This variable provides a means of identifying an individual's status with regard to the FU at the time of the 2001 interview.

Value/Range	Code Value/Range Text

    1 - 20 Individuals in the family at the time of the 2001 interview

    51 - 59 Individuals in institutions at the time of the 2001 interview

ER33603   "RELATION TO HEAD   01"

2001 Relationship to Head

Note that these relationships are those to the 1999 Head for any individual whose 2001 sequence number
(ER33602) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1999 Head is no
longer present at the time of the 2001 interview, his or her relationship to Head is coded 10; the new 2001
Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this
variable whose sequence numbers (ER33602=01).

ER33604   "AGE OF INDIVIDUAL   01"

Age at the Time of the 2001 Interview

The values for this variable represent the actual age of the individual reported in years on his or her most recent birthday. Consistency of ER33604 with ER33605-ER33606 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

ER71570   "2017 CORE/IMMIGRANT FAM WEIGHT NUMBER 1"

2017 Core/Immigrant Family Longitudinal Weight

This weight variable is used for analysis of Core 1968 and 1997/1999 Immigrant families, it excludes the Immigrant families added in 2017.

The weight is constructed by summing the individual-level weight values (ER34651) for all persons associated with a given PSID response family in 2017 and calculating the average.

Users should note that the new Immigrant 2017 sample (ER66009=4001-4462) has values of zeros for this variable as no historical data is available for these cases and, therefore, they currently should not be included in any longitudinal analysis.

Value/Range	Code Value/Range Text
.000	Immigrant 2017 family first interviewed in 2017 (ER66009=4001-4462)
